

Regional JPI™ for Active A.I. and Foreign Bulls Marketed in the United States

While Jersey Performance Index™ effectively represents most cheese yield pricing systems and multiple component pricing used in the Federal Milk Marketing Order system, there are two marketing conditions which are significantly different. Full-fat Cheese and Fluid JPI provide alternate rankings of bulls for those specific milk marketing conditions. The production component for Full-Fat Cheese JPI is calculated as **-0.08**

(PTA milk) + 2.05 (PTA fat) + 2.15 (PTA protein). For Fluid JPI, the calculation is **.095 (PTA milk) + 1.73 (PTA fat)**. All other components of the regional JPIs are the same: 15% FTI, 12% PL, 7% DPR, 3% FUI and 3% SCS.

“Standard” JPI™ and rankings are boxed, with the regional JPIs printed at right.
