

## August 2014, Code A and F Bulls Marketed in the USA - Regional JPI™

While Jersey Performance Index™ effectively represents most cheese yield pricing systems and multiple component pricing used in the Federal Milk Marketing Order system, there are two marketing conditions which are significantly different. Full-fat Cheese and Fluid JPI provide alternate rankings of bulls for those specific milk marketing conditions. The production component for Full-Fat Cheese JPI is calculated as  $-.008$  (PTA milk) +

$2.00$  (PTA fat) +  $2.25$  (PTA protein). For Fluid JPI, the calculation is  $.095$  (PTA milk) +  $1.73$  (PTA fat). All other components of the regional JPIs are the same: 15% FTI, 12% PL, 10% DPR, 6% SCS. Bulls are ranked by Full-fat JPI on the left and Fluid JPI on the right. Official JPI™ and rankings are boxed. See the report "A.I. Marketed Bulls (A/F)" on pages 12-17 for complete information on these bulls.
