

March 2015 - Top 100 Jersey Polled Females Ranked by Genomic JPI™ (GJPI)

The top 100 Jersey Polled females—cows and heifers—with genomic evaluations are listed, ranked by their Genomic Jersey Performance Index™ (GJPI). To qualify for this list, cows must (1) have registry status of HR (no prefix), GR or PR; (2) have a genomic genetic evaluation; (3) must have calved within the past 27 months; and (4) not have a termination code associated with the current lactation. Heifers must (1) have registry status of HR or GR, (2) be no older than three years of age on March 3, 2015 and (3) not have a GPTA based on lactation information.

Genomic evaluations are calculated from an information source identified in the column labeled GT: (1) genotype of the animal is indicated by the density of the genotype chip used (3K, 6K, 8K, 50K, 80K, 770K, or HD); (2) GI, genotype imputed from genotypes of progeny, but the animal is not genotyped; or (3) GA, evaluation includes information from genotypes or imputed genotypes of ancestors, but the animal is not genotyped.
