

Herd Register: Top 200 Cows Ranked by Genomic JPI™ November 2015

The top 200 cows recorded in the AJCA Herd Register are listed in rank order for genomic Jersey Performance Index™ (GJPI). Ties are broken by PTA protein. Cows must have calved within the past 27 months and not have a termination code associated with the current lactation. Genomic evaluations are calculated from the information source listed in the GT column: (1) own genotype indicated by chip density; (2) GI, genotype imputed from genotypes of progeny; or (3) GA, imputed from ancestors. Cows that do not have linear type information are identified by a 0 (zero) in the number of type records (REC) column. They are included in the JPI ranking by using a Parent Average estimate for Functional Trait Index (FTI), but only if the cow was less than four years of age on November 3, 2015.
