

## Genetic Recovery / Jersey Expansion: Top Cows Ranked by Genomic JPI™ March 2016

The top cows enrolled in the Genetic Recovery and Jersey Expansion programs are listed in rank order for genomic Jersey Performance Index™ (GJPI). The cut-off level is determined from the Herd Register version of this report. Cows must have calved within the past 27 months and not have a termination code associated with the current lactation. Genomic evaluations are calculated from the information source listed in the GT column: (1) own genotype indicated by chip density; (2) GI, genotype imputed from genotypes of progeny; or (3) GA, imputed from ancestors. Cows that do not have linear type information are identified by a 0 (zero) in the number of type records (REC) column. They are included in the JPI ranking by using a Parent Average estimate for Functional Trait Index (FTI), but only if the cow was less than four years of age on March 1, 2016.
