

# Herd Register or Generation Count 4-6 and BBR 100: Top 200 Cows Ranked by Genomic JPI™ July 2016

This list ranks by GJPI, the top 200 cows with Herd Register status or that are Generation Count 4 to 6 with a BBR of 100. Cows must have calved within the past 27 months and not have a termination code associated with the current lactation. Source of genomic information is indicated in the GT column: (1) own genotype by chip density; (2) GI, imputed from progeny genotypes; or (3) GA, imputed from ancestors. Cows that do not have linear type information are identified by a 0 (zero) in the number of type records (REC) column. They are included in the JPI ranking by using a Parent Average estimate for Functional Trait Index (FTI), but only if the cow was less than four years of age on July 5, 2016. Ties are broken by PTA protein.
