

Generation Count 3 or GC 4-6 with BBR 93 and Lower: Top Cows Ranked by Genomic JPITM November 2020

This list ranks by GJPI, the top cows recorded at Generation Count 3 or GC 4 through 6 with a BBR of 93 and lower. Cows must have their own genotype, have calved within the past 27 months and not have a termination code associated with the current lactation. Cows that do not have linear type information are identified by a 0 (zero) in the number of type records (REC) column. They are included in the JPI ranking by using a Parent Average estimate for Functional Trait Index (FTI), but only if the cow was less than four years of age on November 3, 2020. Ties are broken by PTA protein.
