

Genetic Recovery / Jersey Expansion: Top Polled Females Ranked by Genomic JPI™ July 2015

The top polled females (cows and heifers) enrolled in the Genetic Recovery and Jersey Expansion programs are listed in rank order for genomic Jersey Performance Index™ (GJPI). The cut-off level is determined from the Herd Register version of this report. Cows must have calved within the past 27 months and not have a termination code associated with the current lactation. Heifers must be no older than three years of age on July 7, 2015 and not have a GPTA based on lactation information. Genomic evaluations are calculated from the information source listed in the GT column: (1) own genotype indicated by chip density; (2) GI, genotype imputed from genotypes of progeny; or (3) GA, imputed from ancestors.
