

## Sire Conception Rate: All Bulls Listed in NAAB Stud Code Order

Sire Conception Rate (SCR) is a national measure of A.I. bull fertility. For an evaluation to be publishable, a Jersey bull must have an A.I. status other than inactive and cannot be more than 13 years old. Bulls must also have at least 200 services in the last four years, 100 breedings in the most recent 12 months, and have been used in at least 10 herds.

SCR is expressed as the bull's difference from the average of evaluated bulls, which

is set at 0.0 for each evaluation. For example, a bull with an SCR of 5.0 produced a conception rate 5.0% above average.

Bulls are listed in NAAB Code order and sorted within A.I. marketing organizations. Status codes are: A, Active A.I.; C, semen collected; F, foreign-sampled, semen available; G, genomically tested and marketed bull; I, inactive A.I.; L, limited use; N, non-A.I.; and P, multiherd sampled.
