Bull Percentile Ranking Levels (P Level)

The P-level may be the most important guide on the pedigree when evaluating Jersey bulls' genetic merit. The P-level is a percentile ranking of the Parent Average (PA) Jersey Production Index™ (JPI), displayed as P0 through P9. When PA JPI is not available, percentile rankings are based on PA Protein.

The P-level indicates how one bull ranks compared to all other Registered Jersey™ bulls born in the same year. To interpret, insert the P-level in the blank in the following statement: "This bull has a higher PA JPI than ___0 percent of the registered Jersey bulls born in the same year." Example: A P8 bull born in 2019 has a higher PA JPI than 80 percent of the Registered Jersey bulls born in 2019.

The tables show means and minimum values for percentile ranking levels based on Parent Average JPI for the birth years 2015 to 2019 and projected for 2020 and 2021; and also for PA Protein for 2015 to 2019, with projections for 2020 and 2021.
